Comprehension:

Read the given passage and answer the questions that follow -

What is a Plan?

A plan spells out how the resources of a nation should be put to use. It should have some general goals as well as specific objectives which are to be achieved within a specified period of time; in India plans were of five years duration and were called five year plans (we borrowed this from the former Soviet Union, the pioneer in national planning). Our plan documents upto the year 2017 not only specify the objectives to be attained in the five years of a plan but also what is to be achieved over a period of twenty years. This long-term plan is called 'perspective plan'. The five year plans were supposed to provide the basis for the perspective plan.

It will be unrealistic to expect all the goals of a plan to be given equal importance in all the plans. In fact the goals may actually be in conflict. For example, the goal of introducing modern technology may be in conflict with the goal of increasing employment if the technology reduces the need for labour. The planners have to balance the goals, a very difficult job indeed. We find different goals being emphasised in different plans in India.

India's five year plans did not spell out how much of each and every good and service is to be produced. This is neither possible nor necessary (the former Soviet Union tried to do this and failed). It is enough if the plan is specific about the sectors where it plays a commanding role, for instance power, generation and irrigation, while leaving the rest to the market.

SubQuestion No : 31

Q.31 What is the objective of the given passage?

- Options 1. To encourage a five year plan better.
2. To justify the failure of plan.
3. To introduce the basics of national planing.
4. To put into perspective the long-term plan.

Option 3 ID : **4058597663**

Option 4 ID : **4058597666**

Status : **Answered**

Chosen Option : **4**

Comprehension:

Read the given passage and answer the questions that follow -

What is a Plan?

A plan spells out how the resources of a nation should be put to use. It should have some general goals as well as specific objectives which are to be achieved within a specified period of time; in India plans were of five years duration and were called five year plans (we borrowed this from the former Soviet Union, the pioneer in national planning). Our plan documents upto the year 2017 not only specify the objectives to be attained in the five years of a plan but also what is to be achieved over a period of twenty years. This long-term plan is called 'perspective plan'. The five year plans were supposed to provide the basis for the perspective plan.

It will be unrealistic to expect all the goals of a plan to be given equal importance in all the plans. In fact the goals may actually be in conflict. For example, the goal of introducing modern technology may be in conflict with the goal of increasing employment if the technology reduces the need for labour. The planners have to balance the goals, a very difficult job indeed. We find different goals being emphasised in different plans in India.

India's five year plans did not spell out how much of each and every good and service is to be produced. This is neither possible nor necessary (the former Soviet Union tried to do this and failed). It is enough if the plan is specific about the sectors where it plays a commanding role, for instance power, generation and irrigation, while leaving the rest to the market.

SubQuestion No : 37

Q.37 What is the purpose of a plan?

Options 1. to figure out the resources of a nation.

2. to put to use the resources keeping in mind goals and objectives to be achieved within a stipulated amount of time.
3. to figure out general goals and objectives.
4. to put to use the resources with specific objectives only.

Comprehension:

Read the given passage and answer the questions that follow -

Historians do not see time just as a passing of hours, days or years -as a clock or a calendar. Time also reflects changes in social and economic organisation, in the persistence and transformation of ideas and beliefs. The study of time is made somewhat easier by dividing the past into large segments - periods – that possess shared characteristics.

In the middle of the nineteenth century, British historians divided the history of India into three periods: "Hindu", "Muslim" and "British". This division was based on the idea that the religion of rulers was the only important historical change, and that there were no other significant developments – in the economy, society or culture. Such a division also ignored the rich diversity of the subcontinent.

Few historians follow this periodisation today. Most look to economic and social factors to characterise the major elements of different moments of the past.

SubQuestion No : 39

Read the given passage and answer the questions that follow -

Recently I spent several hours sitting under a tree in my garden with the social anthropologist William Ury, a Harvard University professor who specialises in the art of negotiation and wrote the best selling book, *Getting to Yes*. He captivated me with his theory that tribalism protects people from their fear of rapid change. He explained that the pillars of tribalism that humans rely on for security would always counter any significant cultural or social change.

In this way, he said, change is never allowed to happen too fast. Technology, for example is a pillar of society. Ury believes that every time technology moves in a new or radical direction another pillar such as religion or nationalism will grow stronger-in effect, the traditional and familiar will assume greater importance to compensate for the new and untested. In this manner, human tribes avoid rapid change that leaves people insecure and frightened.

But we have all heard that nothing is as permanent as change. Nothing is guaranteed. Pithy expressions, to be sure, but no more than cliches. As Ury says, "people don't live that way from day-to-day. On the contrary, they actively seek certainty and stability. They want to know they will be safe."

Even so we scare ourselves constantly with the idea of change. An IBM CEO once said "We only restructure for a good reason, and if we haven't restructured in a while, that's a good reason. We are scared that competitors technology, and the consumer will put us out of business so we have to change all the time just to stay alive. But if we asked our fathers and grandfathers, would they have said that they lived in a period of little change? Structure may not have changed much. It may just be the speed with which we do things."

SubQuestion No : 45

Q.45 Anthropology is the study of

- Options
1. art of negotiation.
 2. art of growing a garden.
 3. human origins, customs and beliefs.
 4. human congregations in a given time period.

In what will be its second attempt at going public, One MobiKwik Systems – the parent company of fintech firm MobiKwik – on Friday filed a fresh draft red herring prospectus with Sebi to raise Rs. 700 crore through a fresh issue of shares. The size of the proposed IPO is over 50% lower than the previous issue which was planned at Rs 1,900 crore. The IPO does not have an offer for sale component. In 2021, MobiKwik had attempted to get listed on the bourses but stalled its IPO plans on the back of choppy markets and a dismal market debut by bigger peer Paytm. The company said that it may undertake a pre-IPO placement worth up to Rs 140 crore. MobiKwik will use the IPO proceeds to fund growth of its financial services and payment services businesses and make investments in data and technology tools like AI & ML. In an interview with co-founder and CEO Bipin Preet Singh had said that the company's digital credit GMV (gross merchandise value) has seen a multi-fold growth over the past few years.

Read the given passage and answer the questions that follow -

In what will be its second attempt at going public, One MobiKwik Systems – the parent company of fintech firm MobiKwik – on Friday filed a fresh draft red herring prospectus with Sebi to raise Rs. 700 crore through a fresh issue of shares. The size of the proposed IPO is over 50% lower than the previous issue which was planned at Rs 1,900 crore. The IPO does not have an offer for sale component. In 2021, MobiKwik had attempted to get listed on the bourses but stalled its IPO plans on the back of choppy markets and a dismal market debut by bigger peer Paytm. The company said that it may undertake a pre-IPO placement worth up to Rs 140 crore. MobiKwik will use the IPO proceeds to fund growth of its financial services and payment services businesses and make investments in data and technology tools like AI & ML. In an interview with co-founder and CEO Bipin Preet Singh had said that the company's digital credit GMV (gross merchandise value) has seen a multi-fold growth over the past few years.

SubQuestion No : 53

Q.53 MobiKwik stalled its first IPO plans because of

- Options
1. dull markets
 2. violent markets
 3. uncertain markets
 4. jerky markets

Allied Blenders & Distillers (ABD), the largest domestic liquor company, is set to file for a Rs 2,000-crore IPO later this month at a valuation of nearly Rs 20,000 crore, or \$2.5 billion. The company has appointed ICICI Securities, Axis Capital, Kotak Mahindra Capital and JM Financial to manage the public offer.

The IPO will be a combination of a fresh fund-raising by the company and an offer for sale by some of its promoters, in a 50:50 ratio, sources said. It will use Rs 1,000 crore to retire part of its debt and some amount to expand its business, including launch of new brands, they added.

ABD, the makers of popular brands like Officer's Choice and Sterling Reserve, had been planning for some years to go public. ABD is the biggest homegrown alcohol company in India and third largest overall, behind global players Diageo and Pernod Ricard, according to merchant bankers.

A text message sent to Kishore Chhabria, chairman and the main promoter of ABD, did not elicit any reply till the time of going to press. Once listed, ABD will be the first listing of a brewery & distiller in more than a decade. According to BSE data, Globus Spirits was the last such company to go public in 2009.

ABD began its operations in 1988 with Officer's Choice being its flagship brand. Currently it's the third-largest selling whisky in the world. In 2017, ABD forayed into the premium segment with Sterling Reserve.

SubQuestion No : 56

Q.56 ABD is filing its IPO for Rs. 2,000 crore -

- Options
1. to retire part of its debt
 2. to payoff its debt and expand its business
 3. to foray into premium segment and compete with global players.
 4. to expand its business

German luxury carmaker Audi has staged a strong comeback in the Indian market, registering sales of 7,931 units in 2023. The company's volumes had plunged to 1,639 units in 2020.

For Audi, which suffered a major reversal after exiting the diesel segment in 2020 and moving to only a petrol & electric power train strategy the growth in 2023 was 89% over the 4,187 units it had sold in 2022. The surge came even as its close rivals and compatriots Mercedes Benz and BMW have strong diesel line-ups in their portfolios.

For Audi, the numbers have been on an upswing recently, though its overall sales are still some distance away from the peak of 11,192 units it had achieved in 2011.

Balbir Singh Dhillon, head of Audi in India, told that the company has been rapidly expanding its offerings in India as it opts for more locally assembled cars to keep the retail pricing and ownership costs under check. "Our decision to move out of diesels was also absolutely correct as the contribution of the fuel has been coming down with petrol now becoming the dominant powertrain on a share of 65%," he said, adding that "Audi now leads in the petrol segment" over its rivals.

Audi is part of German giant Volkswagen's ecosystem that also sells brands such as Skoda, VW, Lamborghini, and Porsche in India. Dhillon said demand for luxury cars remains strong, and is likely to see record numbers this year.

SubQuestion No : 61

Q.61 The total number of differences in the given sentence, from the passage are -

The surge came even when their close rivals and compatriots Mercedes-Benz and BMW have strong petrol line-ups in their portfolio.

Options 1. 3

Adani Group stocks rallied up to 18% on Wednesday ahead of the Supreme Court's judgment in the Adani-Sebi case. The SC didn't order any investigation by other agencies or bodies like CBI in the case and declined to interfere in Sebi's investigation.

At close of the day's session, all 10 Adani Group stocks were in the green with Adani Energy Solutions (formerly Adani Transmission) leading the pack with a 12% gain. Group flagship Adani Enterprises closed 2.5% higher on the BSE.

The group's total market cap also crossed the Rs 15 lakh-crore mark in Wednesday's session. During the day's trade, the group companies added nearly Rs 64,000 crore to the conglomerate's total market value to Rs 15.1 lakh crore. From its all-time high total market cap of Rs 19.2 lakh crore on January 24, 2023 the day US-based short seller Hindenburg had published its damning report against the group it is still down by Rs 4.1 lakh crore or about 21%, BSE data showed.

Nearly a year ago, Hindenburg had published a report that alleged serious corporate malfeasance by Adani Group including cooking books of accounts, round tripping of own funds to jack up stock prices using offshore entities and over invoicing of import costs. Adani Group denied the allegations but by February 27, the group's market cap had dropped by about 65% to Rs 6.8 lakh crore. Since then, it has

been on a steady upward trajectory, at times helped by SC orders that came in its favour and other regulatory moves.

Among the group's stocks, Adani Power is the biggest gainer since the Hindenburg report last year. The stock has nearly doubled, with the company's market cap now at Rs 2.1 lakh crore from Rs 1.1 lakh crore then. The biggest laggard has been Adani Total Gas, which has lost 72% of its market value from Rs 4.3 lakh crore on January 24, 2023, it is at Rs 1.2 lakh crore. The other top laggards are Adani Transmission, down from Rs 3.1 lakh crore to Rs 1.3 lakh crore, and Adani Enterprises, down from Rs 3.9 lakh crore to Rs 3.4 lakh crore.

SubQuestion No : 66

Q.66 Adani group has had the all time high of -

Adani Group denied the allegations but by February 27, the group's market cap had dropped by about 65% to Rs 6.8 lakh crore. Since then, it has

been on a steady upward trajectory, at times helped by SC orders that came in its favour and other regulatory moves.

Among the group's stocks, Adani Power is the biggest gainer since the Hindenburg report last year. The stock has nearly doubled, with the company's market cap now at Rs 2.1 lakh crore from Rs 1.1 lakh crore then. The biggest laggard has been Adani Total Gas, which has lost 72% of its market value from Rs 4.3 lakh crore on January 24, 2023, it is at Rs 1.2 lakh crore. The other top laggards are Adani Transmission, down from Rs 3.1 lakh crore to Rs 1.3 lakh crore, and Adani Enterprises, down from Rs 3.9 lakh crore to Rs 3.4 lakh crore.

SubQuestion No : 67

Q.67 Hindenburg report alleged that Adani Group -

Options 1.

interfered in Sebi's investigation before Supreme Court's judgement.

2.

had cooked account-books and round tripped own funds to jack down stock prices.

3. Crossed the Rs. 15 lakh-crore mark in Wednesday's session.

4. had indulged in serious corporate malfeasance.

Question Type : MCQ

Question ID : 4058592336

Option 1 ID : 4058597799

Option 2 ID : 4058597801

Option 3 ID : 4058597800

Option 4 ID : 4058597802

Status : Answered

Chosen Option : 4

Comprehension:

Read the given passage and answer the questions that follow -

Adani Group stocks rallied up to 18% on Wednesday ahead of the Supreme Court's judgment in the Adani-Sebi case. The SC didn't order any investigation by other agencies or bodies like CBI in the case and declined to interfere in Sebi's investigation.

At close of the day's session, all 10 Adani Group stocks were in the green with Adani Energy Solutions (formerly Adani Transmission) leading the pack with a 12% gain. Group flagship Adani Enterprises closed 2.5% higher on the BSE.

The group's total market cap also crossed the Rs 15 lakh-crore mark in Wednesday's session. During the day's trade, the group companies added nearly Rs 64,000 crore to the conglomerate's total market value to Rs 15.1 lakh crore. From its all-time high total market cap of Rs 19.2 lakh crore on January 24, 2023 the day US-based short seller Hindenburg had published its damning report against the group it is still down by Rs 4.1 lakh crore or about 21%, BSE data showed.

Nearly a year ago, Hindenburg had published a report that alleged serious corporate malfeasance by Adani Group including cooking books of accounts, round tripping of own funds to jack up stock prices using offshore entities and over invoicing of import costs. Adani Group denied the allegations but by February 27, the group's market cap had dropped by about 65% to Rs 6.8 lakh crore. Since then, it has

been on a steady upward trajectory, at times helped by SC orders that came in its favour and other regulatory moves.

Among the group's stocks, Adani Power is the biggest gainer since the Hindenburg report last year. The stock has nearly doubled, with the company's market cap now at Rs 2.1 lakh crore from Rs 1.1 lakh crore then. The biggest laggard has been Adani Total Gas, which has lost 72% of its market value from Rs 4.3 lakh crore on January 24, 2023, it is at Rs 1.2 lakh crore. The other top laggards are Adani Transmission, down from Rs 3.1 lakh crore to Rs 1.3 lakh crore, and Adani Enterprises, down from Rs 3.9 lakh crore to Rs 3.4 lakh crore.

SubQuestion No : 68

Q.68 Choose the incorrect statement -

Options 1.

1. The group's total market cap also crossed the Rs. 15-lakh-crore mark in Wednesday's session.

2. Among the group's stocks, Adani Power is the biggest gainer.

3. The Supreme Court declined to interfere in Sebi's investigation.

4.

At the close of the day's session, not all of the 10 Adani group stocks were in the green.

Comprehension:

Read the given passage and answer the questions that follow -

The healthcare sector continued to be a hub of private equity deal activity in 2023, with India registering 22 deals valued at \$4.6 billion. This is a tad lower than \$4.7 billion achieved in 2022.

The country's growing middle class is catalysing a significant surge in healthcare expenditure, propelled by the upswing in disposable incomes and a proliferation of insurtech platforms, alongside the presence of private payers, says Bain & Company's annual Global Healthcare Private Equity and M&A report.

India has seen a long-term rise in biopharma-related activity (for example, in generics and active pharmaceutical ingredient manufacturing), albeit with a slowdown year over year, while also witnessing growth in domestic demand driven by an expanding middle class and government Insurance programmes. These macroeconomic dynamics, coupled with a number of successful exits by early investors in India such as TPG's sale of a controlling stake in Care Hospitals to Blackstone -have propelled private equity sponsors to regard India as a place to deploy healthcare capital at scale, it adds.

Globally too, the sector held its own in a tepid market with deals totalling around \$60 billion, despite higher global interest rates, inflationary pressures, and broader geopolitical uncertainty. Biopharma captured the bulk of dealmaking momentum, contributing 48% of global deal value, including six deals of over \$2 billion.

In 2024, investors will continue to bet on the transformative nature of generative AI, new modalities and innovative therapies such as glucagon-like peptide-1 agonists (GLP-1s), and India as a place to deploy healthcare capital at scale, the report says.

Investors seeking to manage geopolitical risk began to broaden their horizons, with India representing the largest share of announced deal value and continuing to see a long-term rise in biopharma-

related activity. The domestic pharmaceutical sector, buoyed by government policies and skilled talent, holds a top three global position in small molecule and generic manufacturing, satisfying 50% of global vaccine needs.

Private equity investors, including Advent International, Carlyle, and PAG, capitalised on this growth, expanding in pharma services like CDMOs and APIs. India has historically served as the back end for many US- and Europe-focused healthcare data and analytics companies. Recent years, however, witnessed a surge in direct-to-consumer digital health companies especially in fitness, wellness, telemedicine, and insurtech.

Investments in Asia-Pacific are evolving, and India's favourable macro tailwinds have made it a leading destination for capital. India has traditionally seen investments in biopharma and providers, and it is still too soon to know whether green shoots in other areas can achieve comparable prominence, the report said.

SubQuestion No : 71

Comprehension:

Read the given passage and answer the questions that follow -

Water Isaacson, biographer of tech visionaries like Steve Jobs and Elon Musk, has also told the story of the many-splendoured Leonardo da Vinci, whose accomplishments sprang from his capacity to marvel at the world.

Leonardo made the two most famous paintings in history - Mona Lisa and The Last Supper - but thought of himself as much a scientist and engineer. Driven by curiosity and equipped with acute powers of observation, he peeled the skin of cadavers to understand the muscles that moved the smile and the mysteries of the skeleton. He studied optics, and mastered shading and perspective: this dimensionality became the supreme innovation of Renaissance art. Leonardo was not formally schooled but saw himself as a 'disciple of experience'.

Everything flowed into everything else, as he looked for patterns and analogies between the human body and the world. His notebooks reveal his 'matchlessly weird' mind with its to-do lists, math challenges, drawings of his boyfriend, bird, theatre props, flying machines, riddles, painting tips, weapons, grotesque heads and fables. He would find patterns in curls of hair, eddies of water and whirls of air.

Being born out of wedlock freed him from following in his father's footsteps as a notary. Illegitimate, gay left-handed, vegetarian: and yet, Leonardo was right at home in 15th century Florence, which welcomed misfits and rebels. A cradle of art and commerce under the Medicis, it was the perfect setting for Leonardo's artistic experiments. He apprenticed at a workshop, learning to sculpt bodies in motion, the folds of drapery the harmonies of geometry. He pioneered sfumato (from the word for smoke) - a way of blurring edges to render objects as they appear to the eye.

Leonardo also worked in theatre pageants, on sets and dazzling props to change scenery. His aerial screw - regarded as a prototype helicopter - came from this experience.

He was impelled by scientific humanism, unbothered by religious dogma. His famous Vitruvian man shows his search for the 'universal measure of man', seeing human bodies as microcosms of the universe.

And yet, the book shows that he was no genius touched by lightning, but a fanciful mortal who enjoyed conception more than completion.

He had masterpieces that remained unfinished, impractical fantasies, flying machines that never flew, military strategies, attempts to square the circle, to divert rivers.

His patrons included the ruthless Ludovico Sforza and Cesare Borgia, he was friends with Niccolò Machiavelli. In midlife, he clashed with the rising star Michelangelo, whose clearcut anatomy renderings he declared wooden rather than human. He refused to paint a rich marchesa no matter how much she begged, but gladly began a painting of a silk merchant's wife; labouring over it until he died, never delivering it to the merchant. That painting was the enigmatic Mona Lisa.

Does Leonardo's life hold out lessons for aspiring creatives? The book has some tips: Be relentlessly curious, pursue knowledge for its own sake, observe. Start with the details, go down rabbit holes, but allow yourself to be distracted too. Collaborate, take notes. Respect facts, but indulge fantasy and let your reach exceed your grasp. And finally, be open to mystery.

SubQuestion No : 76

Q.76 The author of this passage considers Leonardo da Vinci a 'more fanciful mortal' rather than a genius because -

Options 1.

he was impelled by scientific humanism unbothered by religious dogma.

2. he had unfinished masterpieces, impractical fantasies and flying machines that never flew.

3. he was not formally schooled but was 'a disciple of experience'.

4. his accomplishments sprang from his capacity to marvel at the world.

He was impelled by scientific humanism, unbothered by religious dogma. His famous Vitruvian man shows his search for the 'universal measure of man', seeing human bodies as microcosms of the universe.

And yet, the book shows that he was no genius touched by lightning, but a fanciful mortal who enjoyed conception more than completion.

He had masterpieces that remained unfinished, impractical fantasies, flying machines that never flew, military strategies, attempts to square the circle, to divert rivers.

His patrons included the ruthless Ludovico Sforza and Cesare Borgia, he was friends with Niccolò Machiavelli. In midlife, he clashed with the rising star Michelangelo, whose clearcut anatomy renderings he declared wooden rather than human. He refused to paint a rich marchesa no matter how much she begged, but gladly began a painting of a silk merchant's wife; labouring over it until he died, never delivering it to the merchant. That painting was the enigmatic Mona Lisa.

Does Leonardo's life hold out lessons for aspiring creatives? The book has some tips: Be relentlessly curious, pursue knowledge for its own sake, observe. Start with the details, go down rabbit holes, but allow yourself to be distracted too. Collaborate, take notes. Respect facts, but indulge fantasy and let your reach exceed your grasp. And finally, be open to mystery.

SubQuestion No : 77

Q.77 Give one word for the following group of words -

'Mysterious and difficult to understand'

Options 1. fantasy

2. enigmatic

3. marvel

4. weird

Question Type : **MCQ**

Question ID : **4058592349**

Option 1 ID : **4058597846**

Option 2 ID : **4058597845**

Option 3 ID : **4058597843**

Option 4 ID : **4058597844**

Status : **Answered**

Chosen Option : 2

Comprehension:

Read the given passage and answer the questions that follow -

Water Isaacson, biographer of tech visionaries like Steve Jobs and Elon Musk, has also told the story of the many-splendoured Leonardo da Vinci, whose accomplishments sprang from his capacity to marvel at the world.

Leonardo made the two most famous paintings in history - Mona Lisa and The Last Supper - but thought of himself as much a scientist and engineer. Driven by curiosity and equipped with acute powers of observation, he peeled the skin of cadavers to understand the muscles that moved the smile and the mysteries of the skeleton. He studied optics, and mastered shading and perspective: this dimensionality became the supreme innovation of Renaissance art. Leonardo was not formally schooled but saw himself as a disciple of 'experience'.

Everything flowed into everything else, as he looked for patterns and analogies between the human body and the world. His notebooks reveal his 'matchlessly weird' mind with its to-do lists, math challenges, drawings of his boyfriend, bird, theatre props, flying machines, riddles, painting tips, weapons, grotesque heads and fables. He would find patterns in curls of hair, eddies of water and whirls of air.

Being born out of wedlock freed him from following in his father's footsteps as a notary. Illegitimate, gay left-handed, vegetarian: and yet, Leonardo was right at home in 15th century Florence, which welcomed misfits and rebels. A cradle of art and commerce under the Medicis, it was the perfect setting for Leonardo's artistic experiments. He apprenticed at a workshop, learning to sculpt bodies in motion, the folds of drapery the harmonies of geometry. He pioneered sfumato (from the word for smoke)- a way of blurring edges to render objects as they appear to the eye.

Leonardo also worked in theatre pageants, on sets and dazzling props to change scenery. His aerial screw - regarded as a prototype helicopter - came from this experience.

He was impelled by scientific humanism, unbothered by religious dogma. His famous Vitruvian man shows his search for the 'universal measure of man', seeing human bodies as microcosms of the universe.

And yet, the book shows that he was no genius touched by lightning, but a fanciful mortal who enjoyed conception more than completion.

Chosen Option : 3

Comprehension:

Read the given passage and answer the questions that follow :

After a roller-coaster ride on the wealth rankings last year, Gautam Adani is back to being Asia's wealthiest person -days after the country's top court said no new probes were needed into Hindenburg Research's bombshell allegations against the tycoon's conglomerate.

Adani's net worth rose in to \$7.7 billion a day \$97.6 billion, reclaiming the top spot in the region from Mukesh Ambani, according to Bloomberg Billionaires Index. Ambani, chairman of Reliance Industries, was trailing by a narrow margin with a net worth of \$97 billion, the index shows.

The comeback of the first generation entrepreneur, who started off as a diamond trader in the 1980s, caps an eventful year for Adani's ports-to-power conglomerate. Despite denying Hindenburg's allegations of corporate fraud, the Adani Group lost more than \$150 billion in market value at one point last year and spent months wooing back investors, lenders, repaying debt and assuaging regulatory concerns.

Adani Group's stocks rallied after Supreme Court this week ordered the local markets regulator to conclude its investigation into the conglomerate within three months and said no more probes were needed, effectively drawing a line under the year-long short-seller saga.

The court reprieve stoked a \$13.3 billion wealth gain for Adani - world's largest this year - after logging one of the world's largest wealth losses in 2023.

Adani's net worth, however, is yet to fully recover from the short-seller's broadside. It was at \$118.9 billion at the close of January 24, just before Hindenburg's report was published.

Adani, whose conglomerate has committed an investment of \$100 billion over the next decade for green transition across its businesses, is back to rapidly diversifying his empire beyond his coal trading origins into data centers, AI, urban development, air ports and media.

SubQuestion No : 81

Q.81 The reason for Gautam Adani regaining his position of being the wealthiest person in Asia is -

Options 1.

- that the Bloomberg Billionaires Index shows him ahead of Mukesh Ambani.
- that it has been able to woo back the investors and lenders.
- a roller-coaster ride on the wealth rankings last year.
- the Supreme Court saying that no new probes were needed into the allegations against the Adani Group.

Read the given passage and answer the questions that follow:

Auto Expo, which has for years been India's premier motor show, is set to lose some sheen with government lining up Bharat Mobility Expo, a three day event starting February 1. The event will bring 11 agencies representing the multiple segments, from car makers to components, tyres, electric vehicles, construction to battery and electronics outfits under one platform.

While this year's show has been put together quickly, a talking point in industry circles is commerce and industry minister Piyush Goyal's suggestion to expand the Mobility Show beyond Bharat Mandapam (the original venue of the Auto - Expo when it was called Pragati Maidan) to also include the recently completed Yashobhoomi in Dwarka, and subsequently the Noida Expo Centre (the current home of the Auto Expo).

While Goyal did not give any dates for next year, Auto Expo has been held every alternate year in January-February.

At a meeting on Friday, the minister was candid about a pushback from industry players when he first suggested the mega mobility show. The minister's suggestion that this won't be a one-off event got industry players talking about the possibility of dealing with it next year too.,

For the moment, the Society of Indian Automobile Manufacturers or Siam, the Auto Expo is sticking to its plan. "Let this event (Bharat Mobility) get over," said a functionary.

While the industry lobby group has been pitching it as ~ a main auto show, several top players have been giving it a miss. For instance, in 2023, many major players, ~ including Mahindra & Mahindra, Honda, Mercedes, BMW, VW, Skoda, Hero Honda and Bajaj Auto decided to skip the event.

In contrast, Goyal has nudged the entire mobility sector to join Bharat Mobility Expo as part of its drive to position India as an attractive MICE (meetings, incentives, conferences and exhibitions) destination with several shows, including those for textiles, gems and jewellery and food lined up until March.

So far, 600 exhibitors, including over 50 from overseas, are expected to participate in this edition's Bharat Mobility, the organizers said.

SubQuestion No : 86

Q.86 The 'M' in MICE stands for -

- Options
1. Mobility
 2. Mercedes
 3. Meetings
 4. Manufacturers

While the industry lobby group has been pitching it as ~ a main auto show, several top players have been giving it a miss. For instance, in 2023, many major players, ~ including Mahindra & Mahindra, Honda, Mercedes, BMW, VW, Skoda, Hero Honda and Bajaj Auto decided to skip the event.

In contrast, Goyal has nudged the entire mobility sector to join Bharat Mobility Expo as part of its drive to position India as an attractive MICE (meetings, incentives, conferences and exhibitions) destination with several shows, including those for textiles, gems and jewellery and food lined up until March.

So far, 600 exhibitors, including over 50 from overseas, are expected to participate in this edition's Bharat Mobility, the organizers said.

SubQuestion No : 88

Q.88 Choose the word that means the same as -

'Saying what you think openly and honestly'

- Options
1. candid
 2. talking
 3. pitching
 4. conference

Chosen Option : **1**

Comprehension:

Read the given passage and answer the questions that follow:

Auto Expo, which has for years been India's premier motor show, is set to lose some sheen with government lining up Bharat Mobility Expo, a three day event starting February 1. The event will bring 11 agencies representing the multiple segments, from car makers to components, tyres, electric vehicles, construction to battery and electronics outfits under one platform.

While this year's show has been put together quickly, a talking point in industry circles is commerce and industry minister Piyush Goyal's suggestion to expand the Mobility Show beyond Bharat Mandapam (the original venue of the Auto - Expo when it was called Pragati Maidan) to also include the recently completed Yashobhoomi in Dwarka, and subsequently the Noida Expo Centre (the current home of the Auto Expo).

While Goyal did not give any dates for next year, Auto Expo has been held every alternate year in January-February.

At a meeting on Friday, the minister was candid about a pushback from industry players when he first suggested the mega mobility show. The minister's suggestion that this won't be a one-off event got industry players talking about the possibility of dealing with it next year too.,

For the moment, the Society of Indian Automobile Manufacturers or Siam, the Auto Expo is sticking to its plan. "Let this event (Bharat Mobility) get over," said a functionary.

While the industry lobby group has been pitching it as ~ a main auto show, several top players have been giving it a miss. For instance, in 2023, many major players, ~ including Mahindra & Mahindra, Honda, Mercedes, BMW, VW, Skoda, Hero Honda and Bajaj Auto decided to skip the event.
